

New modular system that will change the way your customers think about first aid in the workplace.

A practical, convenient and innovative new system, designed to effectively equip your workplace with first aid, ensuring your legal requirements are met.

All workplaces are unique, the first aid requirements are too. Choosing from six individual options will let you create the Workplace First Aid System your risk assessment demands.

Workplace + Eye Wash

OR

Workplace + Burns + AED

Spectra is customisable to fit within any environment. It's easy to match the panels required with the level of risk in any workplace. Each panel will interlock with others to provide a comprehensive and complimentary first aid solution.

Our carefully thought out design makes products easily identifiable in an emergency and easy to access when you need them. Products can either be taken directly from each panel, or the appropriate kit can be removed and taken to the casualty.

The modern and smart design will feel equally at home in any office setting or warehouse.

Spectra is made from high quality ABS plastic, which not only means it looks great, it's also durable and strong enough to last in tough environments.

Each panel contains useful product information, a primary kit, designed for the intended location, and supplementary products to enhance the practicality of the panel.

Two joining pieces for the top and bottom (included with each system), connect two or more stations together.

Main kits are securely attached to the main panel, yet easily removed in an emergency.

Each panel includes guidance signage to assist in relevant first aid measures.

Select 1, 2, 3, 4, 5 or even 6 panels for your system - any combination is possible ...once installed, Spectra supplies exactly what is needed, instantly.

AED + Biohazard + Catering + Eye Wash + Burns
